PROTECTIONS POUR MACHINES AUTOMATIQUES
SCHUZTSYSTEME FUR AUTOMATISCHE MASCHINEN

EN

The SP Line includes extruded aluminium profiles and accessories to create machine safety guards and railings and perimeter safety guards for automatic machines.

Interlocking joints ensure quick and easy assembly, while the closed profiles prevent dirt build-up and offer an attractive look.

The SP Line catalogue encloses the EVO series, with glass-fibre reinforced nylon joints, and the FPZ series, with polyamide joints reinforced with an aluminium core.

The EVO and FPZ systems are ideal to create frames, structures, casings and guards in all sectors of the packaging industry and in production systems for various sectors such as mechanical engineering, chemical, pharmaceutical, textile and foodstuffs.

IT

Line SP comprende profili in alluminio estruso e accessori per la realizzazione di protezioni antinfortunistiche a bordo macchina e protezioni perimetrali per la messa in sicurezza delle macchine automatiche.

I giunti ad incastro garantiscono una notevole facilità e velocità di montaggio; i profili chiusi evitano l'accumulo di sporco oltre a restituire un ottimo risultato estetico.

Il catalogo Line SP comprende la serie EVO, con giunti in nylon rinforzato con fibra di vetro, e la serie FPZ, con giunti in poliamide rinforzati da un'anima in alluminio.

I sistemi EVO e FPZ trovano applicazione nella realizzazione di telai, strutture, carterizzazioni e protezioni in tutti i settori del packaging e negli impianti di produzione per diversi tipi di settore tra cui quello meccanico, chimico, farmaceutico, tessile e alimentare.

ES

La línea SP incluye perfiles de aluminio extruido y accesorios para fabricar protecciones de maquinaria y protecciones perimetrales para garantizar la seguridad de las máquinas automáticas.

Las uniones por encaje garantizan una gran facilidad y rapidez de montaje; los perfiles cerrados evitan la acumulación de suciedad y permiten obtener un resultado estético excelente.

El catálogo Line SP incluye la serie EVO, con uniones de nailon reforzado con fibra de vidrio, y la serie FPZ, con uniones de poliamida reforzadas con núcleo de aluminio.

Los sistemas EVO y FPZ se utilizan para fabricar bastidores, estructuras, cárteres de cobertura y protecciones para todos los sectores del embalaje y para las instalaciones de producción de distintos sectores como el mecánico, el químico, el farmacéutico, el textil y el alimentario.

FR

La Ligne SP comprend des profilés en aluminium extrudé et des accessoires pour la réalisation de protections de prévention des accidents à installer sur une machine et de protections périmétriques de mise en sécurité des machines automatiques.

Les joints à encastrement garantissent une grande facilité et une grande rapidité de montage; les profilés fermés évitent les dépôts de saletés et garantissent par ailleurs une esthétique irréprochable.

Le catalogue de la Ligne SP comprend la série EVO, avec des joints en nylon renforcé à la fibre de verre, et la série FPZ, avec des joints en polyamide renforcé par une âme en aluminium.

Les systèmes EVO et FPZ permettent la réalisation de châssis, de structures, de carters et de protections dans tous les secteurs du conditionnement et sur les installations de production dans divers secteurs tels que le secteur mécanique, chimique, pharmaceutique, textile et alimentaire.

DE

Die Linie SP umfasst eloxierte Aluminiumprofile und Zubehörteile für Maschinenschutzeinrichtungen und Schutzeinhausungen zur Absicherung von Fertigungsautomaten.

Die Steckverbindungen sichern eine mühelose und schnelle Montage; die geschlossenen Profile vermeiden das Ansammeln von Schmutz und gewährleisten zudem ein hervorragendes ästhetisches Ergebnis.

Der Katalog der Linie SP enthält sowohl die EVO Serie mit Verbindungsstücken aus glasfaserverstärktem Nylon als auch die FPZ Serie mit Aluminiumkern verstärkten Verbindungsstücken aus Polyamid.

Die EVO und FPZ Systeme eignen sich für die Realisierung von Rahmen, Strukturen, Abdeckungen und Schutzeinrichtungen für Verpackungsmaschinen jeglicher Art sowie für Produktionsanlagen in zahlreichen Branchen wie im Maschinenbau, in der Pharmazeutik, in der chemischen sowie in der Textil- und Lebensmittelindustrie.

EN

EVO is the complete and versatile Alusic range designed specifically to provide high-quality solutions for machine guards and railings which can be easily incorporated into the machine system.

Each and every detail contained in the catalogue has been designed specifically to ensure that the products comply with the Machinery Directive 2006/42/EC and to allow manufacturers to achieve the best possible results while reducing their assembly time.

The particular geometry of the accessories does not require complex work on the EVO series profiles, a particularly low-cost range with two significant advantages: optimised assembly time and reduced machining costs.

In addition to their functionality, the design focused particularly on the aesthetic aspect to ensure a range of components with well-balanced lines.

The product range is supported by fast and complete service, an advantage deriving from the immediate availability of the items in our warehouse.

IT

EVO è la linea Alusic versatile e completa ideata appositamente per offrire soluzioni di qualità per la realizzazione di protezioni a bordo macchina facilmente integrabili nel sistema macchina.

Ogni dettaglio degli articoli presenti all'interno del catalogo è stato studiato per ottenere un prodotto in linea con la Direttiva macchine 2006/42/CE e per mettere il costruttore nella condizione di ottenere il massimo risultato riducendo i tempi di montaggio.

La particolare geometria degli accessori non richiede lavorazioni complesse sui profili della serie EVO, una linea estremamente economica con due importanti vantaggi: l'ottimizzazione dei tempi di montaggio e la riduzione dei costi di lavorazione.

Oltre alla funzionalità, nella progettazione è stata posta particolare attenzione all'estetica conferendo ai componenti linee armoniose ed equilibrate.

Il pacchetto di prodotti è accompagnato da un servizio rapido e completo, punto di forza derivante dalla disponibilità immediata degli articoli presso i nostri magazzini.

ES

EVO es la línea Alusic versátil y completa que ofrece soluciones de calidad para la fabricación de protecciones incorporadas en la máquina que se integran fácilmente en el sistema máquina.

Se ha estudiado cada detalle de los artículos presentes en el catálogo para obtener un producto conforme a la Directiva 2006/42/CE relativa a las máquinas y para que el fabricante pueda obtener el máximo resultado reduciendo los tiempos de montaje.

Gracias a la geometría especial de los accesorios no es necesario realizar mecanizados complejos en los perfiles de la serie EVO, una línea sumamente económica con dos ventajas importantes: la optimización de los tiempos de montaje y la reducción de los costes de producción. En el diseño se ha ido más allá de la funcionalidad y se ha prestado especial atención a la estética, dotando a los componentes de líneas armoniosas y equilibradas.

El paquete de productos se acompaña con un servicio rápido y completo, ventaja derivada de la disponibilidad inmediata de los artículos en nuestros almacenes.

FR

EVO est la ligne Alusic flexible et complète spécialement conçue pour offrir des solutions de qualité afin de réaliser des protections à installer sur une machine et faciles à intégrer au système de la machine elle-même.

Chaque détail des produits du catalogue a été pensé pour obtenir un produit conforme à la Directive Machines 2006/42/CE et pour mettre le constructeur dans des conditions lui permettant d'obtenir un résultat optimal tout en réduisant les temps de montage.

La configuration géométrique particulière des accessoires n'impose pas d'usinages complexes sur les profilés de la série EVO, ligne très économique qui offre deux avantages importants: l'optimisation des temps de montage et la réduction des coûts d'usinage.

En outre, la conception a fait une place très importante à la fonctionnalité tout en accordant une grande attention à l'esthétique en conférant aux différentes pièces des lignes harmonieuses et équilibrées.

La gamme de produits s'accompagne d'un service rapide et complet, atout qui repose sur la disponibilité immédiate des articles dans nos entrepôts.

DE

EVO ist eine vielseitige und komplette Linie, die speziell für hochwertige Lösungen für den Aufbau von Maschinenschutzeinrichtungen entwickelt wurde.

Jedes Detail der Artikel im Katalog wurde so gestaltet, um ein Produkt gemäß der Richtlinie 2006/42/EG zu erhalten, und um den Hersteller in die Lage versetzen, durch Verkürzung der Montagezeiten das maximale Ergebnis zu erreichen.

Die besondere Geometrie der Zubehörteile erfordert keine komplexe Bearbeitung der Serie EVO Profilen, eine preiswerte Linie mit zwei große Vorteile: Optimierung der Montagezeiten und Reduzierung der Bearbeitungskosten.

Neben der Funktionalität, besonderes Augenmerk auf die Ästhetik des Designs gelegt wurde, um den Komponenten harmonische und ausgewogene Linien zu geben.

Das Produktangebot enthält einen schnellen und kompletten Kundendienst, dank der sofortigen Verfügbarkeit von Artikeln in unseren Lagern.

JOINTS

GIUNTI / JUNTAS / JOINTS / VERBINDER

EN

Product technical specifications:**Glass-fibre reinforced semi-crystalline polyamide (PA6+GF) - Colour: RAL 7023**

The glass-fibre reinforcement allows the joints to be used in high-temperature environments (up to 110° C at constant temperature and up to 240° C for short periods), and also increases the wear resistance compared to the base polymer.

IT

Caratteristiche tecniche del prodotto:

Materiale termoplastico parzialmente cristallino + sfere vetro (PA6+GF) - Colore: RAL 7023

La carica in sfere di vetro, permette ai giunti di essere impiegati in ambienti con temperature elevate (fino a 110°C in continuo e per tempi brevi anche fino a 240°C) inoltre aumenta la resistenza all'usura rispetto al polimero base.

ES

Características técnicas del producto:

Material termoplástico parcialmente cristalino + esferas de vidrio (PA6+GF) - Color: RAL 7023

La carga en esferas de vidrio permite que las juntas se utilicen en ambientes con altas temperaturas (hasta 110 °C de forma continua y por tiempos cortos incluso hasta 240 °C) y también aumenta la resistencia al desgaste en comparación con el polímero base

FR

Caractéristiques techniques du produit:

Matériau thermoplastique semi-cristallin + billes de verre (PA6+GF) - Couleur : RAL 7023

La présence de billes de verre permet d'utiliser les joints dans des environnements exposés à des hautes températures (jusqu'à 110 °C en exposition constante et jusqu'à 240 °C pour bref exposition) ainsi que d'augmenter la résistance à l'usure par rapport au polymère de base.

DE

Technische Produktmerkmale:

Semikristalliner Thermoplast + Glaskugeln (PA6+GF) - Farbe: RAL 7023

Die Verstärkung mit Glaskugeln ermöglicht die Verwendung der Verbinder in Hochtemperaturbereichen (bei konstanter Temperatur bis 110 °C und kurzzeitig bis 240 °C) und erhöht die Verschleißbeständigkeit gegenüber dem Basispolymer.

Mechanical characteristics:	Not affected by the following chemicals:
• Good impact strength • Extremely durable • High fatigue strength • Wear resistance	• Petrol • Hydrocarbons • Oils and grease • Alkaline solutions in general
Caratteristiche meccaniche:	Resistente a:
• Buona resistenza all'urto • Buona resistenza all'invecchiamento • Elevata resistenza alla fatica • Resistenza all'usura	• Benzina • Idrocarburi • Olii e grassi • Soluzioni alcaline in genere
Características mecánicas:	Resistente a:
• Buena resistencia al impacto • Durable • Alta resistencia a la fatiga • Resistencia al desgaste	• Gasolina • Hidrocarburos • Aceites y grasas • Soluciones alcalinas en general
Caractéristiques mécaniques:	Résistant à:
• Bonne résistance aux chocs • Durable • Haute résistance à la fatigue • Résistance à l'usure	• Essence • Hydrocarbures • Huiles et graisses • Solutions alcalines en général
Mechanische Eigenschaften:	Beständig gegen:
• Gute Schlagfestigkeit • Gute Alterungsbeständigkeit • Hohe Ermüdungsbeständigkeit • Verschleißbeständigkeit	• Benzin • Kohlenwasserstoffe • Öle und Fette • Alkalische Lösungen allgemein

The joints must be installed after the application of the rapid adhesive; insert them in the profiles using a rubber mallet, avoiding to damage the joint, following the sequence shown in the images below:

I giunti devono essere montati applicando della colla a presa rapida e inseriti successivamente nei profili utilizzando un martello in gomma, facendo attenzione a non rovinare il giunto, rispettando la sequenza riportata nelle immagini sottostanti:

Las uniones se montan aplicando cola de secado rápido y posteriormente se introducen en los perfiles utilizando un martillo de goma, cuidando de no dañar la junta, respetando la secuencia que se muestra en las imágenes siguientes:

Les joints doivent être assemblés en appliquant de la colle à prise rapide, puis insérés dans les profilés à l'aide d'un marteau en caoutchouc, en ayant soin de ne pas endommager le joint, en respectant la séquence illustrée dans les images ci-dessous:

Schnell abbindender Klebstoff im Profil auftragen und der Verbinder mit einem Gummihammer in das Profil einschieben. Darauf achten, dass der Verbinder nicht beschädigt wird. Siehe die Bilder unten:

The same joint allows the use of profiles with or without seal:

Con lo stesso giunto si possono usare profili con o senza guarnizione:

Con la misma unión se pueden utilizar perfiles con o sin junta:

Avec le même joint, il est possible d'utiliser des profilés avec ou sans joint pour panneau:

Die Verbinder sind für Profile mit oder ohne Scheibendichtung geeignet:

013.025.006 installation with seal / 013.025.002 for 4 mm panel / 013.025.004 for 5 mm panel

013.025.006 montaggio con guarnizione / 013.025.002 per pannello 4 mm / 013.025.004 per pannello 5 mm

013.025.006 montaje con junta / 013.025.002 para panel de 4 mm / 013.025.004 para panel de 5 mm

013.025.006 montage avec garniture / 013.025.002 pour panneau de 4 mm / 013.025.004 pour panneau de 5 mm

013.025.006 Montage mit Scheibendichtung / 013.025.002 für 4-mm-Platte / 013.025.004 für 5-mm-Platte

Alusic Line Evo profiles, made to hold panels from 3 to 12 mm, in versions with and without seals, are the ideal solution for the assembly of guards.

The profile joints must be glued to ensure long-term durability and reliability of the assemblies.

IT

I profili Alusic linea Evo, dotati di sedi per pannelli da 3 a 12 mm in versione con e senza guarnizione, sono la soluzione ideale per la realizzazione di ripari.

La giunzione tra i profili necessita di incollaggio per una durata ed affidabilità degli assemblaggi nel tempo.

ES

Los perfiles Alusic line Evo, provistos de alojamientos para paneles de 3 a 12 mm en versión con y sin junta, son la solución perfecta para los resguardos.

La unión entre los perfiles requiere un encolado para garantizar la duración y la calidad del ensamblaje a lo largo del tiempo.

FR

Les profilés Alusic line Evo, dotés de logements pour panneaux de 3 à 12 mm, avec ou sans garniture selon la version, sont la solution idéale pour la réalisation de protections.

La jonction entre les profilés nécessite un collage garantissant la durée et la fiabilité des assemblages dans le temps.

DE

Die mit Aufnahmen für Paneele von 3 bis 12 mm Stärke sowie mit oder ohne Dichtung ausgestatteten Profile Alusic Line Evo stellen die ideale Schutzlösung dar.

Die Profilverbindungen müssen verklebt werden, um eine langlebige und zuverlässige Montage sicherzustellen.

EN

The frames of the FPZ Evo line must be joined to the basic profiles with double-sided tape (code 013.818.004). They are extremely simple to apply. As soon as they are joined together, the double-sided adhesive still allows a short-term handling for perfect coupling.

Application sequence:

1. clean / degrease the two surfaces
2. apply the double-sided tape on the hidden side of the frame
3. remove the protection strip
4. join the two profiles
5. adjust the coupling if necessary and press the two profiles lightly

IT

Le cornici della linea FPZ Evo vanno unite ai profili base con del nastro biadesivo (cod. 013.818.004). Sono semplici da applicare. Appena uniti, il biadesivo consente nel breve periodo di effettuare ancora alcuni aggiustamenti per un accoppiamento perfetto.

Sequenza per l'applicazione:

1. pulire / sgrassare le due superfici
2. applicare il nastro biadesivo sul lato nascosto della cornice
3. rimuovere la striscia di protezione
4. unire i due profili
5. aggiustare se necessario l'accoppiamento e premere leggermente i due profili

ES

Los marcos de la línea FPZ Evo se unen a los perfiles básicos con cinta de doble cara (cod. 013.818.004). Son simples de aplicar. Tan pronto como se unen, el adhesivo de doble cara permite un acoplamiento perfecto.

Secuencia para la aplicación:

1. limpiar / desengrasar las dos superficies
2. aplicar la cinta de doble cara en el lado oculto del marco
3. retirar la tira de protección
4. unir los dos perfiles
5. ajustar el acoplamiento si es necesario y presionar ligeramente los dos perfiles

FR

Les cadres de la ligne FPZ Evo sont joints aux profils de base avec du ruban adhésif double face (code 013.818.004). Ils sont simples à appliquer. Dès qu'ils sont assemblés, l'adhésif double face permet une manipulation à court terme pour un couplage parfait.

Séquence d'application:

1. nettoyer / dégraisser les deux surfaces
2. appliquer le ruban adhésif double face sur le côté caché du cadre
3. enlever la bande de protection
4. joindre les deux profilés
5. régler l'accouplement si nécessaire et appuyez légèrement sur les deux profils

DE

Die Rahmen der FPZ Evo-Linie sollen mit doppelseitigem Klebeband (Art.-Nr. 013.818.004) zu den Basisprofilen verbunden werden. Sie sind einfach anzuwenden. Sobald sie zusammengesetzt sind, ermöglicht das doppelseitige Klebeband eine kurzfristige Handhabung für eine perfekte Kopplung.

Anwendung:

1. Beide Oberflächen reinigen / entfetten
2. Das doppelseitige Klebeband am Profil anbringen
3. Den Schutzstreifen abziehen
4. Beide Profile verbinden
5. Die Kopplung regulieren und leicht auf die beiden Profile drücken

EN

In this section you will find end caps, fasteners, joints, hinges, handles and components for sliders and guards.

IT

In questa sezione possiamo trovare tappi di chiusura, viteria, giunzioni, cerniere, maniglie ed elementi per scorrevoli e per la realizzazione di protezioni.

ES

En esta sección encontrará tapones de cierre, tornillería, uniones, bisagras, asideros y elementos para correderas y para la realización de protecciones y resguardos.

FR

La présente section contient des bouchons de fermeture, de la visserie, des joints, des charnières, des poignées et des éléments pour coulissants et pour la réalisation de protections.

DE

In diesem Abschnitt finden wir Verschlusskappen, Schrauben, Verbinder, Scharniere, Griffe und Elemente für Schiebekonstruktionen und für die Schaffung von Schutzvorrichtungen.

CALCOLO PER IL MONTAGGIO DI UNA MOLLA A GAS

GAS SPRING INSTALLATION CALCULATION / CÁLCULO PARA EL MONTAJE DE UN MUELLE DE GAS
CALCUL POUR LE MONTAGE D'UN RESSORT À GAZ / BERECHNUNG FÜR DIE MONTAGE EINER GASDRUCKFEDER

Definizione della forza di estensione F1 (N) a 20° C

Defining the extension force F1 (N) at 20° C

Definición de la fuerza de extensión F1 (N) a 20 °C

Définition de la force d'extension F1 (N) à 20°C

Definition der Dehnungskraft F1 (N) bei 20° C

$$F1 = \frac{G \times D}{b \times n} \times 13 \text{ (N)}$$

G = Peso del portellone in Kg

Weight of door in kg / Peso de la puerta en kg / Poids du battant en kg / Gewicht der Klappe in kg

L = Distanza tra il baricentro ed il punto di rotazione in mm

L = Distance between the centre of gravity and point of rotation in mm / Distancia entre el centro de gravedad y el punto de rotación en mm / Distance entre le barycentre et le point de rotation en mm / Abstand zwischen Schwerpunkt und Drehpunkt in mm

b = Braccio di leva utile della molla a gas in mm, portellone aperto

b = Effective lever arm of gas spring in mm with door open / Brazo de palanca útil del muelle de gas en mm, con la puerta abierta / Bras de levier utile du ressort à gaz en mm, battant ouvert / Nutzhebelarm der Gasdruckfeder in mm, geöffnete Klappe

13 = Coefficiente di conversione kg - N + riserva di sicurezza

13 = kg to N conversion factor + safety margin / Coeficiente de conversión kg - N + reserva de seguridad
Coefficient de conversion kg - N + marge de sécurité / Umrechnungsfaktor kg - N + Sicherheitsmarge

P = Fissaggio del portellone ca.2/3 L

P = Connection to door at approx. 2/3 of L / Fijación de la puerta en 2/3 L aprox. / Fixation du battant environ 2/3 L / Befestigung der Klappe ca.2/3 L

n = Numero delle molle a gas (Standard: n = 2)

n = Number of gas springs (2 x standard) / Número de muelles de gas (estándar: n = 2) / Nombre de ressorts à gaz (Standard : n = 2) / Anzahl der Gasdruckfedern (Standard: n = 2)

D = Braccio di leva utile della forza di gravità in mm, portellone aperto

D = Effective lever arm of force of gravity in mm with door open / Brazo de palanca útil de la fuerza de gravedad en mm, con la puerta abierta / Bras de levier utile de la force de gravité en mm, battant ouvert / Nutzhebelarm der Schwerkraft in mm, geöffnete Klappe

Esempio

Example / Ejemplo / Exemple / Beispiel

G = 30 kg, D = 400 mm, b = 200 mm, n = 2

$$F1 = \frac{30 \times 400}{200 \times 2} \times 13 = 390 \text{ N}$$

EN

FPZ is a range of extruded aluminium profiles and accessories which is ideal to create aluminium machine frames and perimeter safety guards for industrial machinery in compliance with the Machinery Directive 2006/42/EC.

The range features joints with an aluminium core, making it particularly suitable for applications requiring structures with a high mechanical strength. The simple interlocking fastening system of the joints allows fast assembly, without compromising the look of the finished product.

IT

FPZ è la serie di profili in alluminio estruso e accessori ideale per la realizzazione di protezioni antinfortunistiche a bordo macchina e protezioni perimetrali per macchine industriali in conformità con la Direttiva macchine 2006/42/CE.

La linea è caratterizzata da giunti con anima in alluminio che la rendono particolarmente adatta alle applicazioni in cui occorre che la struttura abbia un'ottima resistenza meccanica. Il semplice fissaggio ad incastro dei giunti permette di eseguire il montaggio in tempi brevi senza trascurare l'estetica del prodotto finito.

ES

FPZ es la serie de perfiles de aluminio extruido y accesorios, perfecta para fabricar protecciones contra accidentes incorporadas en la máquina y protecciones perimetrales para máquinas industriales de conformidad con la Directiva 2006/42/CE relativa a las máquinas.

La línea se caracteriza por sus uniones con núcleo de aluminio que la hacen especialmente adecuada para aplicaciones en las que la estructura debe tener una resistencia mecánica excelente. La fijación por encaje de las uniones es sencilla y permite realizar el montaje en muy poco tiempo sin descuidar la estética del producto acabado.

FR

FPZ est la série de profilés en aluminium extrudé et d'accessoires, idéale pour la réalisation de carter de protection pour la prévention des accidents et de protections périmétriques pour les machines industrielles en conformité avec la Directive Machines 2006/42/CE.

La ligne se caractérise par des raccords avec âme en aluminium qui en font une ligne parfaitement adaptée aux applications pour lesquelles la structure doit offrir une résistance mécanique optimale. Une simple fixation des raccords par emboîtement permet de réaliser le montage très rapidement sans négliger l'esthétique du produit fini.

DE

FPZ ist die Serie aus stranggepressten Aluminiumprofilen und Zubehöerteilen für Unfallschutzvorrichtungen an Maschinen und Schutzeinfassungen von Industriemaschinen nach der Maschinenrichtlinie 2006/42/EG.

Die Linie umfasst Verbindungsstücke mit Aluminiumkern, und ist daher vor allem für solche Anwendungen bestimmt, in denen hohe mechanische Beständigkeit verlangt wird. Die einfache Steckbefestigung der Verbindungsstücke erlaubt eine schnelle Montage ohne Abstriche an die Optik der fertigen Struktur.

PROFILE FASTENING

FISSAGGIO DEI PROFILI / FIJACIÓN DE LOS PERFILES / FIXATION DES PROFILÉS / BEFESTIGUNG DER PROFILE

The fastenings between the various profiles use interlocking joints:

Il fissaggio tra i vari profili avviene tramite i giunti ad incastro:

La fijación entre los distintos perfiles se realiza mediante las uniones por encaje:

La fixation des différents profilés les uns aux autres s'effectue au moyen de joints à encastrement:

Die Befestigung zwischen den verschiedenen Profilen erfolgt mittels Steckverbindungen:
